

Client: The London Golf Club

Project: Club House & Estate

Background

The London Golf Club and Taylor Technology Ltd have just upgraded both the intruder and CCTV system security requirements at The Ash Manor Estate. The works commenced in February 06 and was successfully completed in March 06. Works started in the main building followed by golf services, pro shop and the tournament office.

System Overview

The intruder alarm system installed comprises of over 130 circuits throughout the estate. The CCTV concentrates on protecting all visitors and members of the club for safety and security reasons.

Control of all the cameras is accessible via the clubs

internal network. The high quality images are provided by Samsung

Day/Night Cameras with Pentax Aspherical Lens' with Motion detection.

The heart of the security system is provided by Menvier 2500 control panel and four remote keypads situated in key outbuildings throughout the estate. These enable the users to control either their associated buildings or if permitted by their level of security code the complete estate.

"Taylor technology provided a first class service and top quality installation. A Professional company that offer experience and expertise in order to protect your business. They are extremely flexible and are able to work around the demands of your business to ensure minimal disruption."

Andy Shewbridge
Assistant Manager
The London Golf Club
