

Client: **Ogilvy & Mather**

Project: **Canary Wharf CCTV System**

Background

Ogilvy & Mather and Taylor Technology Ltd have just worked closely in designing and delivering the CCTV System for the security requirements at Cabot Square. The installation commenced February 06 and was successfully completed late March 06.

Control of the system is operated with 3 Dedicated Micro's Digital Recorder Units, viewing is via the Ogilvy Network.

CCTV signage around the site helps to deter and warn staff, contractors, visitors and intruders that CCTV operates on the site for the purposes of safety and security reasons.

System Overview

The Security System installed comprised of 38 Camera's, all of which have motion detection. Fire exit doors, stairwells, lift lobbies and general office areas are covered by CCTV to control the entry/exit on to the premises for staff, contractors and visitors.

Ground floor reception has CCTV to cover the entrance doors and turnstiles for safety and security purposes.

"We could immediately see the advantages of using Taylor Technology for our installations, the benefits of using single supplier for both CCTV and Access was a major benefit"

Dave Goulding
Facilities Director
